

Delete a Device

"There are devices in Open-Audit I need to remove to free-up licenses or just because I don't want them reported. How do I delete devices?"

Step-by-step guide

This process is applicable starting with Open-Audit v 2.x

1. Edit the device and set its Status to 'Deleted'.
 - a. Open a browser to: `http://<hostname>/omk/open-audit/devices`
 - b. On the far right of the table click the box for each device that should be deleted.
 - c. At the upper right hand corner of the table click the blue 'Edit' Button.
 - d. On the next page find the 'Status' field.
 - i. Click the edit icon to the right of this field.
 - ii. From the drop down menu select deleted.
 - iii. Click the green check box to the right of the field that has just appeared.
2. Go to menu -> Admin -> Database -> View Tables.
3. Click the 'system' table's View icon.
4. You'll see various options for deleting rows (devices) from the database on that page. Click the RED Delete button in the Device Status: Deleted row.

Need to delete lots of devices at once? Check out: [How to Bulk Edit device attributes](#)

The screenshot shows the Open-Audit Enterprise 2.0.1 interface. The top navigation bar includes 'Discover', 'Report', 'Manage', 'Modules', 'Licenses', 'Admin', 'Help', and 'Administrator'. The main content area is titled 'Database' and shows the 'system' table selected. The table has 4 rows. The 'Device Status' column shows 1 row with status 'deleted' and 3 rows with status 'production'. There are 'Export Data' buttons for CSV, SQL, and XML. Below the table is a 'Columns' section with a table of column details.

Name	Type	Default	Max Length	Primary Key	Valid Values
id	int		10	true	
uuid	varchar		100		
name	varchar		200		
ip	varchar		45		
hostname	varchar		100		
dns_hostname	varchar		100		
domain	varchar		100
