

NMIS 9: getting beta all the time

We've been a bit remiss in not posting news items for new NMIS 9 beta releases for a while, so here you are:

the most recent NMIS 9 release, 9.0.5, went out this week. This is what we'd call a 'very late beta' release, development progress has been good and we're getting very close to a general release.

If you would like to try out NMIS 9 please contact us at beta@opmantek.com and we'll send you a download link.

You may also want to check out the [NMIS 9 Release Notes page](#) to see what we've been up to.
