Changes to Google Maps API Policy

Starting June 2018 Google has implemented a pay-as-you-go pricing model for the Google Maps Platform APIs. Previously, most users with moderate usage could use Google Maps, which are embedded into opCharts and Open-Audit Professional/Enterprise, for free. Google's new policy is outlined HERE: <https://developers.google.com/maps/documentation/javascript/usage-and-billing>

In order to enable Google Maps you will need to a Google API Key follow this link and log in with your Google account: <https://cloud.google.com/maps-platform/#get-started>

1. Select Maps from the product choices then press continue. NOTE: If the next page to select a project does not open then click on Get Started on the Google Maps Platform website to redo this step.

Enable Google Maps Platform

To enable APIs or set up billing, we'll guide you through a few tasks:

1. Pick product(s) below
2. Select a project
3. Set up your billing

<input checked="" type="checkbox"/> Maps Build customized map experiences that bring the real world to your users.	<input type="checkbox"/> Routes Give your users the best way to get from A to Z.	<input type="checkbox"/> Places Help users discover the world with rich details.

Adding Your API Key to opCharts

Once you have your Google API key you will need to add it to opCommon.nmis to enable Maps in opCharts. You can find opCommon.nmis in /usr/local/omk/conf/opCommon.nmis, edit the file with vim (or another suitable text editor) and search for the opcharts_map_api_key property.

Adding your API Key to Open-Audit Professional/Enterprise

Open Open-Audit Professional/Enterprise and select Admin -> Configuration -> All from the menu. Search for maps_api_key and place your API key in the value position.
