

Uploading Custom Map Icons and Backgrounds using the web interface

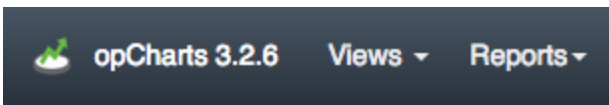

As of the opCharts 3.2.6 update you can now upload custom Map Icons and Backgrounds using the web interface.

Join Paul McClendon, an Opmantek Support Engineer, as he demonstrates how to insert a background image to an opCharts map.

To do this, navigate to menu -> System -> Files as shown below.

From here you can select the Resource type icon, or maps_background. Give the resource a name, then click "Browse" to navigate to the location of the desired file for the icon or background. Once the file is selected click Upload.

What the title can be used for.

Resource Name

Name of the resource for displaying in menus.

File

No file selected.

Current Issues

There is a outstanding issue uploading files with spaces in the filename, Rename the file to remove spaces before you upload files.

After the files are uploaded you can view them in the uploaded files menu at the bottom of the Files screen.

Resource Name	Resource Type	Filename	Uploader	Image
Kangaroo	icon	198559-200.png	nmis	
Forest	maps_background	forest.jpg	nmis	
Server image	icon	serverimage.png	nmis	

Show 5

To use the newly uploaded files in a map, edit an existing map or create a new map. Select the Background Image drop-down menu and find the file you uploaded to import the desired Background image.
