

Patching NMIS with 8.3.9G Update

NMIS 8.3.9G is being released for general availability, and this is essential when wanting to implement the new Opmantek Commercial modules like opMaps, opReports, opHA, opFlow, opSLA.

Install CPAN Module Net::SMTP::SSL

NMIS8 now requires Net::SMTP::SSL so that you can send notification emails using services like Google GMail.

```
cpan  
install Net::SMTP::SSL
```
