nmis8.3.9g some doubts

Hi,

Sorry, but I have some doubts, first of all, it´s necessary to tell you that it´s my first time in install and admin nmis.

I have installed 8.3.9g and I don´t know how to:

- If you are logged, where can I logout, and finish de session?
- It´s possible to change interface graph description, by deffault in top of the grapbh we can see : <node> <interface> <graph-period> , and I wold like to see interface description.
- And the last it´s, why can I see graph of port-channels for 4500, but not for 3750

Thank you.

PD: I hope you can understand my english
