

Adjust Session Expiration

How do I adjust the logout, or expiration time, for the web GUI?

Step-by-step guide

For Open-Audit Community:

1. Edit `/usr/local/open-audit/code_igniter/config/config.php`, Line 252. See `$config['sess_expiration'] = 7200;`
2. Adjust the Session Expiration, expressed in seconds, to your new value
3. To turn off logout set this to: `$config['sess_expiration'] = 0;`
4. Save your file.
5. Restart the `omkd` daemon and `apache` to load the new settings

For Open-Audit Professional/Enterprise:

1. Edit `/usr/local/omk/conf/opCommon.nmis`
2. Search for `auth_expire_seconds`
3. Adjust the `auth_expire_seconds` to your new value
4. Save your file.
5. Restart the `omkd` daemon and `apache` to load the new settings
