

Release Notes for Open-Audit v2.0.8

Released 2017-09-28.

- [Overview](#)
- [Change Log](#)

Overview

Open-Audit 2.0.8 is mostly a bug fix and polish release.

We have introduced a new Wizard for running your first Discovery, along with a Product Tour for those people new to Open-Audit.

The discoveries collection (list) page now shows a status as well as X from Y devices discovered progress. The discoveries read page now has selectable panels for differing logs. Devices Discovered will show only those devices found on a given IP. All IPs shows every IP that was scanned and whether a device was found. Debug is the raw log.

Credentials are now not stored at the device levels AS WELL as at the credentials collection level. Their is still the ability to provide a specific set of credentials for a given device.

We added proxmox guest retrieval to the audit linux script.

Change Log

Open-Audit	Bug	Fixed link on licenses read template for device.
Open-Audit	Bug	Fixed bug in VM processing.
Open-Audit	Bug	Disabled audit esxi via script (for now). Audits for ESXi still work via SNMP and SSH directly.
Open-Audit	Bug	Fix bug in execute AD discovery.
Open-Audit	Improvement	Add a duration for discovery scan.
Open-Audit	Improvement	Linux audit script improved partition auditing. Prefer curl to wget for SAN submission.
Open-Audit	Bug	Do not show the (non-existent) command for discoveries::read on an AD Discovery.
Open-Audit	New Feature	Linux audit script add proxmox guests enumeration.
Open-Audit	Improvement	Do NOT store individual device credentials that are the same as those in the credentials collection.
Open-Audit	Improvement	Linux audit script remove hard set of Vmware for manufacturer.
Open-Audit	Improvement	Linux audit script normalise centos os_family. Improve version (remove trailing .).
Open-Audit	Improvement	Linux audit script only select the first domain in hostname -A for dns_domain.
Open-Audit	Bug	Use correct test, when inserting IP's
Open-Audit	Bug	Fix link to OAE from default index.html page.
Open-Audit	Improvement	Set type to computer if we get a valid WMI result for UUID.
Open-Audit	Improvement	Extra Windows OS name matches.
Open-Audit	Improvement	Remove initial access log. Move loading of input, output, errors and orgs to MY_Controller.
Open-Audit	Improvement	Add the collector_uuid when forwarding to the server.

Open-Audit	Improvement	Do not attempt to create DNS entries when not a collector.
Open-Audit	Improvement	Fixed w3c validation errors and warnings.
Open-Audit	Improvement	Added calls to language function where missing in templates.
Open-Audit	Bug	Fix retrieval of Ubiquiti Model in ssh helper.
Open-Audit	Improvement	Allow for HTML in error logs. This will show the page output when discovery attempted to submit its result and received an error.
Open-Audit	Improvement	When processing a discovery result, go as far as retrieving the XML, then send the page back to the caller so the script will continue to the next IP without waiting for the full server side discovery (audit_ssh, snmp, script, etc) to complete.
Open-Audit	Improvement	Improve discoveries_collection template to show status and discovered.
Open-Audit	Improvement	Do not log the command output from an ESXi audit.
Open-Audit	Bug	Move unlink to after audit command sent. Do not kill on failed audit, break loop only. Fix vmware script (from os_group).
Open-Audit	Bug	Fix bug (not using \$device-> for ubuntu codename).
Open-Audit	Improvement	Ensure we test a lower case mac.
Open-Audit	Improvement	Show status on discovery collection.
Open-Audit	Improvement	Log from discovery scripts into database.
Open-Audit Professional	Improvement	Fixed w3c validation errors and warnings.
Open-Audit Professional	Improvement	Added calls to language function where missing in templates.
Open-Audit Professional	New Feature	Added Wizard for first time credentials and discoveries.
Open-Audit Professional	Bug	Prevent collection template display of dynamically created config items.
Open-Audit Professional	New Feature	Selectable logs for "Devices Found, "All IPs" and "Debug" on the discoveries::read template
Open-Audit Professional	Improvement	Make all create forms use the left side for Notes / About. Remove info panel.
Open-Audit Professional	Improvement	Add 'Advanced' button on discoveries page. Show/Hide non-essential options.
Open-Audit Professional	Improvement	Restore Bulk Edit -> Discover button.
Open-Audit Professional	Improvement	Add bulk edit to queries template.
Open-Audit Professional	Improvement	Add device by audit upload.
Open-Audit Professional	Improvement	Add ssh key password to credentials::create form.
Open-Audit Professional	Improvement	Device action buttons moved to second nav on device details template.
Open-Audit Professional	Improvement	Don't int, rather round to two decimal places (where we don't have an int) the network card speed for display in the template.
Open-Audit Professional	Bug	Fix index page where eula is only shown in specific cases.

Open-Audit Professional	Improvement	Change default table length to 50 rows.
Open-Audit Professional	New Feature	Show status icons and a count of devices discovered / total on the discoveries collection page.
