

Errata - 2.3.1 Setting the first_seen attribute

There is a bug in the file:

Linux - /usr/local/open-audit/code_igniter/application/models/m_device.php

Windows - c:\xampplite\open-audit\code_igniter\application\models\m_device.php

Please add the below at line 1094 onwards to rectify this issue.

```
if (empty($details->first_seen)) {  
    $details->first_seen = $this->config->config['timestamp'];  
}
```

This bug causes new devices to have a "first seen" attribute value of 2001-01-01 00:00:00 and hence they will not appear in the Devices Discovered X reports.

Apologies for any inconvenience caused.

This has been rectified for our next release.
