

NMIS 9.0.0e beta release

We've released Version 9.0.0e of NMIS 9 today. This is a late beta release that works pretty well and we're getting close to a general release. It's possible to run NMIS 8 and 9 in parallel on a single system, so experimenting with the next generation of NMIS is quite easy.

If you would like to try out NMIS 9 please [contact us](#) at beta@opmantek.com and we'll send you a download link.

The [NMIS 9 Release Notes](#) page outlines what news each NMIS 9 release brings.
