

NMIS 9.0.1 beta release

We've released Version 9.0.1 of NMIS 9 today. This is a late beta release that works pretty well and we're getting close to a general release. It's possible to run NMIS 8 and 9 in parallel on a single system, so experimenting with the next generation of NMIS is quite easy.

The [NMIS 9 Release Notes](#) page outlines what news each NMIS 9 release brings.
