

Home

Opmantek's opReports module will help you automate the creation and distribution of detailed operational and executive-level reports.

This advanced reporting module contains a suite of preconfigured reports designed to delve into the enormous amounts of data that NMIS collects about your network to deliver insight into service levels and measure the performance of your environment against short and long-term trends.

Getting Started

Download

opReports is available as a stand-alone [download](#) or part of the Opmantek [Virtual Machine \(VM\)](#).

View the opReports product page on [Opmantek.com](#).

Installation, Configuration, and Basic Setup

- [Installation Guide](#) (opReports 4)
- [opReports 3 Installation and Upgrade Guide](#)
- [opReports Configuration](#) (opReports 3)

Key Documentation

opReports Report Types

- [Overview of the available Report Types](#)
 - [Node Report](#)
 - [Node Health Report](#)
 - [Configuration Summary Report](#)
 - [WAN Report](#)
 - [WAN Utilisation Distribution Report](#)
 - [WAN Utilisation Distribution Summary Report](#)
 - [QoS Report](#)
 - [CoS Report](#)
 - [Uptime Report](#)
 - [Response Time Report](#)
 - [Interface Utilisation Report](#)
 - [Interface Unicast Packets Report](#)
 - [CPU Report](#)
 - [Free Memory Report](#)
 - [Memory Pool Report](#)
 - [Monitored Services Report](#)
 - [Traffic Usage Report](#)
 - [Traffic Summary Report](#)
 - [Node Availability Report](#)
 - [Grouped Availability Report](#)
 - [Interface Capacity Report](#)
 - [Grouped Interface Capacity Report](#)
 - [Traffic Snapshot Report](#)
 - [UPS Configured Models Report](#)
 - opReports 3.5.2 and newer (not yet in opReports 4):
 - [Burst Billing and Customer Exceeds Bandwidth Reports](#) which require a [Burst Billing Customer List File](#):
 - [Burst Billing Summary Report](#)
 - [Burst Billing Report](#)
 - [Bandwidth Exceeds Contract Report](#)
 - opReports 4.3.0 and newer:
 - [GPON Port Reports](#) which support [Node and GPON Port List File](#):
 - [GPON Port Utilisation Report](#) (modeled on [Interface Utilisation Report](#))
 - [GPON Port Capacity Report](#) (modeled on [Interface Capacity Report](#))
 - [GPON Port User Traffic Report](#) (modeled on [Traffic Usage Report](#))

opReports Advanced Concepts

- [How to generate reports from the GUI and the command line](#)
- [Formats for Report Periods and Frequencies](#)
- [How to control the styling of HTML reports](#)
- [Known Reports Cache](#)
- [Parallel opReports Solution: New platform opReports 3.5.2 running in parallel with old platform OMK Apps including opReports 3.2.0](#)
- [Parallel opReports Solution: New platform opReports 3.4.1 running in parallel with old platform OMK Apps including opReports 3.2.0](#)

Additional Documentation

Walk-Throughs

- [Scheduling Reports](#) (for periodic reporting)
- Special options for the new [Traffic Snapshot](#) report type
- [How to select Nodes \(and Interfaces\) for reporting in opReports 3](#)
- [How to select Nodes \(and Interfaces\) for reporting in opReports 4](#)

Webinars

- [Webinar - The Network Managers Guide to Reporting](#)
- [Webinar - How to Improve Network Performance by 50% Every Month](#)
