

Release Notes for Open-Audit v3.1.2

Released 2019-07-08

Linux SHA256: 1b3050aa2fd7e449b316688b187a6a3f75a45cac9cea911ec413e2052e97c543

Linux md5sum: 83042456dcab19598b321297bda3076e

Version	Type	Description
Open-Audit Community	Improvement	Reset the log command output when returning from device::match for improved discovery_log.
Open-Audit Community	Improvement	Add a couple of stderr redirects to null for mariadb and nginx tests in audit_linux.sh
Open-Audit Community	Improvement	Refactor and reformat wmi_helper for consistency and improved SMB2 auditing (default).
Open-Audit Community	Improvement	Revise WMI Helper for better Windows password handling. Windows password CAN NOT contain single or double quotes from this point forward.
Open-Audit Community	Improvement	Add warning about quotes in Windows passwords on credentials dictionary item.
Open-Audit Community	Bug	Fix discover_subnet.sh mostly for Centos 6 (old bash) correctly parse URL (substitute discovery for logs).
Open-Audit Community	Bug	Fix code error in function call for 3.0.2 upgrade.
Open-Audit Community	Bug	Fix running a single device discovery from the device details screen.
Open-Audit Community	Bug	Use correct config variable for discovery_use_vintage_service in include_input_discoveries and discovery_helper.
Open-Audit Community	Bug	Replace all instances of ->config->item(with ->config->config[to enable easy find/replace to avoid old PHP errors when using it in a return value (affects Centos).
Open-Audit Community	Improvement	Provide details of working credential sets.
Open-Audit Community	Improvement	Add timezone from MySQL into the response->meta object.
Open-Audit Community	Bug	Fix an upgrade from < 2.2.7 issue when exporting credentials from clouds table (which did not exist prior to 2.2.7).
Open-Audit Professional	Bug	Fix test on Audit My PC page to fail if default network address is localhost (or 127.).
Open-Audit Professional	Improvement	Buttons on welcome page to be normal size and use text-wrap to be somewhat responsive.
Open-Audit Cloud	Improvement	Only display link to OAC device if not running Cloud on devices_read template.
Open-Audit Cloud	Bug	Fix links in templates for cloud image items. Fix attempting to sort an empty array when getting custom images.
Open-Audit Cloud	Bug	Fix link to images when running on cloud in queries_execute template.
Open-Audit Cloud	Improvement	Only show Feedback menu item if running Cloud.
Open-Audit Cloud	Improvement	Add Feedback as a centered top level menu item.
Open-Audit Professional	Improvement	Display credential sets that have worked (last discovery) on the device details page.
Open-Audit Collector	Improvement	Add the current date/time and timezone to collector dashboard.

Open-Audit Professional	Improvement	Add timezone to current datetime display on tasks templates.
Open-Audit Professional	Improvement	Tweak devices_read template to not wrap discovery log columns for timestamp and status.
Open-Audit Enterprise	Improvement	Remove debug dumper and provide default refresh time on clouds_read template.
Open-Audit Professional	Bug	Fix errors template to not error when no \$response provided.
Open-Audit Cloud	Improvement	Add cloud collector download to menu.
