opCharts 4.0.12 Release Notes

RELEASED   February 20th, 2020

Bug Fixes

- Fixed traffic light colors for nodes status showing in the node filter.
- Fixed multiple issues with RBAC:
    - Now is possible to add a role in NMIS Group Permissions.
    - RBAC users were not able to click in the node name.
    - RBAC users are able to see node details.
    - Hide permissions button for RBAC users from Views > Dashboard.
    - Hide RBAC permissions on Maps.
- Interface Selection view now sorts by node name.
- Interface table now sorts by In and Out Util.
- Fixed search in Dashboard view.
- Fixed bug when trying to show a default dashboard.
- Fixed issue where you could not search for an interface name in Business Service view.
- Fixed Schedule Outage Screen: now it is possible to schedule and Outage (Need NMIS 9.0.10).
- Hide menu Items for Collectors and Polling definitions.
- This version requires the update to opHA 3.0.7.
