opCharts MSP Configuration Options

Configuration options which Managed Service Providers *(*MSPs) will find useful for configuring opCharts.

Action	Config Option	Default	Description	Version From
Disable the node context menu in a map	opcharts_gui_node_auto_topology_context_menu	true	Set to **false** to disable the context menu when right clicking on a node within a map	
Disable the custom link button for a node	opcharts_gui_display_node_custom_context	true	Set to **false** to disable the custom context link shown for a node	
Disable the "SSH" Button for a node	opcharts_gui_display_node_ssh	true	set to **false** to disable the ssh to node button	
Disable the "View in NMIS Button"	opcharts_gui_display_view_in_nmis	true	set to **false** to not display the button	
Disable the Modules List in the opCharts GUI	opcharts_gui_display_modules_list	true	set to **false** to not display the menu	
Display different application title	opcharts_application_heading	null	Set to a string you like, e.g. "Opmantek Network Performance"	
Disable the Help Menu	opcharts_display_all_help	1	set to **0 (zero)** to not display the help	
Disable "Node Performance Graphs" button	opcharts_gui_node_performance_button	true	set to **false** to hide	
Display topology nodes which user does not have permission for	opcharts_show_not_allowed_top_nodes	0 (false)	set to **1 (one)** to show the nodes a customer is not allowed to see in the topology, this is useful in Enterprise situations but not for MSP customers.	
Allows each user to have a custom logo set via user preferences.	opcharts_gui_display_custom_logo	false	Set to true for the gui to render the custom logo the user has set in their preferences.	
Display the Node Tools Button when viewing a node	opcharts_show_node_tools	0 (false)	Set to 1 (true) to display the admin node tools for ping, traceroute, etc of a node.
