Pristine Centos 7.8.2003 Dependencies: opHA 3.5.2

DEPENDENCIES: nmis9.0.0 mongodb-org rrdtool httpd httpd-tools logrotate libpng12

We recommend that you check our Wiki article:
https://community.opmantek.com/x/KQjcAg

SELinux install notes:
SELinux is not enabled.
SELinux additional notes:
SELinux needs extensive configuration to work properly.
In its default configuration it is known to interfere with opHA,
and we do therefore recommend that you disable SELinux.
See "man 8 selinux" for details.
NMIS9 install notes:
Establish NMIS9 dependencies for NMIS9 install and install NMIS version 9.0.0 or newer.
nmis9.0.0
mongodb-org install notes:
pre-install newest available version 4.2 before installing NMIS9 or opHA.
mongodb-org additional notes:
Please note that opHA requires MongoDB to be either installed
locally on this server, OR accessible via the network. MongoDB also
MUST be configured for authentication, and needs to be primed
specifically for Opmantek use as documented on this page:
https://community.opmantek.com/x/h4Aj
mongodb-org
rrdtool install notes:
rrdtool

dependency check complete.
