

Finding logged entries of processes killed by OOM Killer

[How to Adjust Linux Out-Of-Memory Killer Settings for PostgreSQL](#)

Logging of processes killed by OOM Killer is not consistent as to where logged on different Linux operating systems. The following grep command will assist in finding logged entries:

```
# run on Debian 10.7 - illustrates logging on Debian 10 is to /var/log/kern.log
sudo grep -arFnFi 'Killed process' /var/log/

/var/log/kern.log.1:51188:Dec 30 20:37:21 omk-vm8-debian10 kernel: [ 451.435966] Killed process 2586
