Introduction

The license endpoint allows you to track the number of licenses found on your devices..

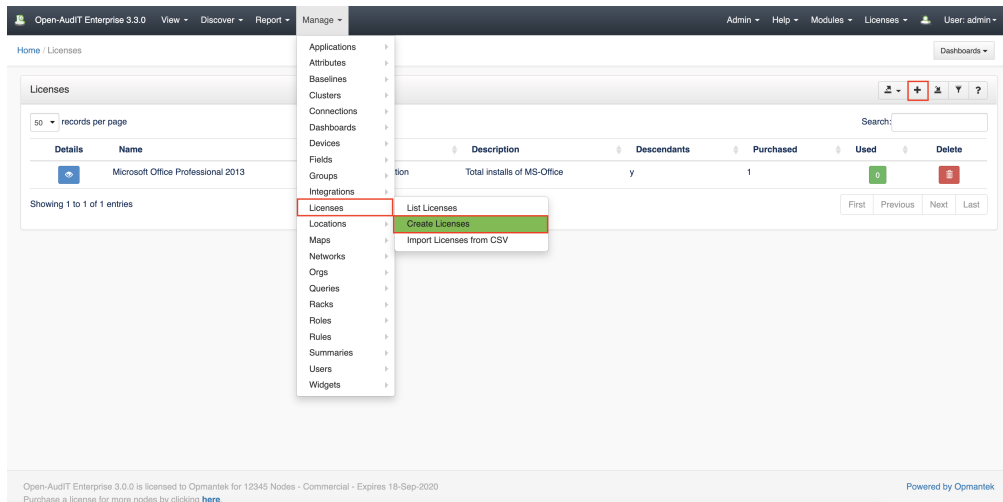

How Does it Work?

Open-AuditT uses the data collected from your devices and matches the software installed with the value provided, it counts the matches calculates how many licenses have been used and how many are left. It allows the use of wildcards on the "match string" field which matches the `software.name` attribute.

Creating a Licenses Entry

A License entry can be created using the web interface if the current user logged in has a role that contains the `licenses::create` permission. Go to menu: Manage -> Licenses -> Create Licenses. Also can be created from the Licenses View, using the "+" button.

To create an entry to track your licenses you have to provide a name, an organization, the number of licenses acquired and the name of the software. On the field "Match String" you have to provide the name of the software that you want to track, you can use the percent sign (%) as a wildcard in the `match_string`.

About

The license endpoint allows you to track the number of licenses found on your devices.

To create an entry to track your licenses you must provide a name, an organization, the number of licenses acquired and the name of the software. On the field `match_string` you must provide the name of the software that you want to track, you can use the percent sign (%) as a wildcard in the `match_string`.

For more detailed information, check the [Open-Audit Knowledge Base](#).

Notes

You can use the percent % sign as a wildcard in the `match_string`.

Open-Audit Enterprise 3.0.0 is licensed to Opmantek for 12345 Nodes - Commercial - Expires 18-Sep-2020
Purchase a license for more nodes by clicking [here](#).

Powered by Opmantek

View License Details

Go to menu: Manage -> Licenses -> List Licenses.

You will see a list of Licenses. You can view a License by clicking on the blue view icon.

You can also edit or delete the licenses.

Database Schema

The database schema can be found in the application if the user has database::read permission by going to menu: Admin -> Database -> List Tables, then clicking on the details button for the table.

API / Web Access

You can access the collection using the normal Open-Audit JSON based API. Just like any other collection. Please see [The Open-Audit API documentation](#) for further details.
