

opExport Release Notes

This is a brief overview of the major changes between opExport releases.

opExport 1.6.8

Released 9 Sep 2015

Highlights

- This version interoperates fully with NMIS 8.5.10G, and requires at least this version of NMIS to be installed. Please check the [Product Compatibility](#) page for details.

opExport 1.6.5

Highlights

- Ping only nodes can now be exported in any table by adding "include_ping_only" : 1 to the schema entry in schema_sets.json
- MySQL Server Queue View is now displayed has been improved : Menu -> Views -> Queue (MySQL Only)

Fixes

- highly unlikely concurrency issue resolved that could cause the daemon to crash
