

opCharts 1.3.0 Upgrade Guide

- [Prerequisites](#)
- [Upgrade](#)
 - [Stop Daemon](#)
 - [Upgrade](#)
 - [Update Configuration](#)
 - [Start Daemon](#)
 - [Important Next Steps](#)

Prerequisites

- A running opCharts system
- A new version downloaded to /tmp/
- A new version of rrdtool-omk downloaded to /tmp/

Upgrade

Stop Daemon

```
service omkd stop
```

Upgrade

```
# upgrade
cd /usr/local
tar zxvf /tmp/opCharts-Linux-x86_64-1.3.0.tgz
tar zxvf /tmp/rrdtool-binpkg-5.16.tgz
```

Update Configuration

```
conf/opCommon.nmis (update to these values):
'opcharts_gui_default_chart_x' => 4,
'opcharts_gui_full_size_x' => 5,
```

In addition, you will probably want to update all size_x in conf/charts/dashboards.json. The easiest way to do this is to copy install/charts/dashboards.json overtop of your existing file, beware this will remove any dashboards you may have created. To update the file manually edit conf/charts/dashboards.json:

```
Search for:
"size_x" : 2 (or "2")

Replace with:
"size_x" : 4
```

Start Daemon

```
# start service
service omkd start
```

Important Next Steps

- Load GUI and accept EULA
