

Disable Widgets for opMaps and opFlow in NMIS Dashboard GUI

NMIS includes integration with a few of our commercial applications, namely [opMaps](#) and [opFlow](#), these widgets can be disabled in the NMIS configuration.

Disable opMaps Widget

Edit the NMIS configuration, typically `/usr/local/nmis8/conf/Config.nmis`, look for the 'modules' section, and change the `display_opmaps_widget` setting to `false`.

```
'display_opmaps_widget' => 'false',
```

Disable opFlow Widget

Edit the NMIS configuration, typically `/usr/local/nmis8/conf/Config.nmis`, look for the 'modules' section, and change the `display_opflow_widget` setting to `false`.

```
'display_opflow_widget' => 'false',
```
