

NMIS Customising the Dashboard Layout - Save Windows and Positions

The NMIS dashboard system includes a powerful feature to be able to change the layout of the dashboard moving around the widgets, selecting which widgets should be displayed, and resizing them all. People want to do this and then save their customised dashboard for the next time they login.

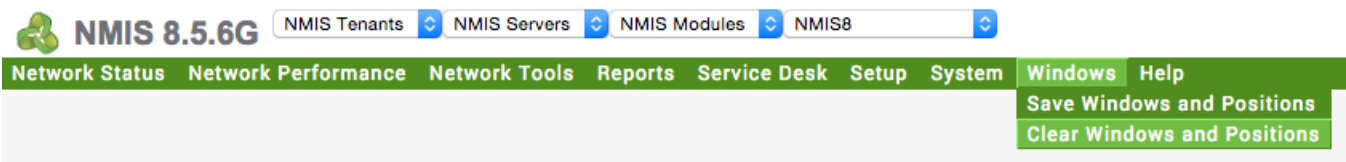

Saving Windows and Positions

To save your layout and positions is very easy, by selecting from the menu "Windows -> Save Windows and Positions", the current layout will be saved for the current user, the next time that user logs into the system, they will see the dashboard just the way they left it (assuming they are using the same size browser window).

Clearing Windows and Positions

To return to the default NMIS windows and positions, select from the menu "Windows -> Clear Windows and Positions",

A simple, handy and powerful feature.
