Ansible Collection

One of our amazing customers has posted their solution for using Ansible to use Open-AudIT as a dynamic inventory and also is able to set values.

Obviously, Opmantek cannot support this, but it's great to see customers taking advantage of Open-AudIT's openness!

You can find the items at the following URL - https://galaxy.ansible.com/sedi/openaudit

And the wiki documentation is here - https://github.com/secure-diversITy/ansible_openaudit/wiki
