

# Release Notes for Open-Audit v4.4.2

Released 2023-02-27

md5sum: a7b904d726c1e92c981616595c5fb6a8

sha256sum: 52381b4fae5585391b57d546cc124c138c005f1dd0e851f10707ae605064e123

Linux only release.

This release brings a lot of bug fixes and improvements.

It is recommended everyone upgrade to this release.

Version	Type	Collection	Description
Professional	Improvement	discoveries	Add a discovery warning for no credentials at all.
Community	Improvement	audit	Removed DirectX info (already disabled) and Outlook Express info from software collection in Windows audit script.
Community	Improvement	audit	In audit_osx, do not set the install source to unknown, but rather an empty string.
Community	Improvement	audit	Add Windows Store-installed applications to the audit windows script. NOTE - disabled by default (at least for now). Edit the audit script and set audit_store_software to 'y' to enable this feature. We hope to refine this feature in the future to return better product names, so this is subject to change.
Community	Bug	discoveries	Fix syntax error that prevents discovering a computer via SNMP.
Community	Bug	blessed subnets	Allow for a /32 blessed subnet when submitting from that IP.
Professional	Bug	discoveries	Restore the missing Discovery Support button on the discoveries::read template
Professional	Improvement	fields	Throw a warning and disallow editing buttons if the field's name contains something other than alphanumeric and underscore.
Professional	Bug	devices	Make Select All work on the devices collection template.
Professional	Bug	tasks	Show type Integration in the dropdown on tasks::read template.
Professional	Improvement	discoveries	Do not allow 'execute' on Discoveries where type = Integration on the list and read templates.
Professional	Bug	fields	Add character validator to name field on fields_create template.
Professional	Bug	configuration	Restore the Test Email button in the configuration.
Professional	Improvement	installer	Remove libpng12 from the installer as it is not required.
Professional	Bug	gui	Fix 'A newer version of \$product is available' on the /omk template.
Enterprise	Bug	racks	Add back the "Add a Device" on the rack view page.
Enterprise	Bug	racks	Fix the pop-over showing the device details on the rack view page.
Professional	Bug	gui	Disable most options in the menu when no license is detected, rather than allow them to be clicked and show an error page.
Professional	Bug	gui	Do not show CSV upload button for collections where not permitted.
Professional	Bug	devices	Fix "upload device by audit result text" form (not file), and enable the Submit button.
